AERATED WATERS.

Much time and attention is given to this
branch of the business, and our process ensures
perfect filtration and purification of the Water
adjustment of the ingredients, and saturation
with gas. The average pressure in the Soda
Water is 36lb to the square inch.
The Machine is of the latest and most im-
proved type driven by a 6 H.P. Engine.
We would recommend the following facts to
our customers—
If Aerated Water is opened carefully and
without agitation it will retain as much gas as
if it were under a pressure of two atmospheres.
If opened and decanted in a violent manner it
retains only what it is capable of absorbing
under the ordinary barometric pressure.
Aerated Water should be stored with the cork
covered by the water.
